Farm Chemicals

Hazardous Chemical Register

A Hazardous Chemical Register is a list of all hazardous chemicals used, handled or stored on your farm.

You must keep the current Safety Data Sheets (SDSs) with this register and make sure it is accessible to workers. The SDS will tell you if the chemical is hazardous, and how to use and manage it safely. The supplier of your chemicals should provide a SDS on request.

Contact the manufacturer or supplier for a copy of the SDS or for more details. Many companies also provide SDSs online.

Chemical name	Manufacturer including Australian contact details	SDS issue date (must be <5 years)	Maximum quantity held on site *	Comments
